

Cognitive Psychology (PSY 3120 Section 1, CRN 22951)
Spring 2012, Jan. 9 – May 3
Prof. Robert Carlson

Class Information

Class Days: Tues. & Thur.
Class Time: 9:00 – 10:15
Class Location: McDonald 206

Contact Information

Office: McDonald 201
Phone: 652-7893
E-mail: rcarlson@dixie.edu

Disclaimer: Details of this syllabus are subject to change (I hope not, but you never know).

Contacting Prof. Carlson: The most effective way to contact me is by e-mail. I check my e-mail regularly, and I am much more likely to remember to respond to an e-mail than to a comment made to me before or after class (I tend to forget those comments, unfortunately). If you speak to me in person, especially away from my office, **make sure to follow up any conversations with an e-mail** to remind me to address the matter in a timely manner. I may not be in my office a lot outside of office hours, but you are welcome to drop by any time to see if I have time to meet with you. If you want to be sure I will be there to talk with you during a time other than official office hours, please feel free to contact me via e-mail to make an appointment.

Course Description: “Introduction to basic principles of human and non-human cognition. Topics include perception, categorization, attention, memory, knowledge representation, judgment and decision making, and problem solving.” (Description from Course Catalog) Basically, we study many aspects of human behavior that are not directly observable. We learn how objective scientific approaches can be used to infer how mental processes are working “behind the scenes.”

Course Objectives: The purpose of this course is for students to demonstrate an understanding of how cognitive psychologists apply the scientific method to develop an understanding of the study of the mind. Students will demonstrate their learning of a variety of scientific techniques used in cognitive psychology, theories of various mental activities, and results of the application of techniques and theories through short quizzes and longer exams. This course does not fulfill a general education requirement but does fulfill a requirement toward the Psychology major.

Course Requirements and Information:

Textbook: *Cognition: Exploring the Science of the Mind*, 4th Edition. (Required)

Other Articles:

Halpern, M., and Miller, G. Online dialog re: Disclaimer by George Miller, retrieved online from members.shaw.ca/philip.sharman/miller.txt.

Miller, G.A. (1956). The magical number seven, plus or minus two: Some limits on our capacity for processing information. *The Psychological Review*, 63, 81-97.

Canvas: We will use Canvas on a regular basis. (Required)

Office Hours: Mon., Tues., Thur., 1:00-1:50; Wed., Fri., 10:00-10:50

Prerequisites: PSY 1010

Course Fees: None

Academic Integrity: Cheating of any kind is not tolerated. Students must take all quizzes and exams independently (without the help of others, except for appropriate disability

services). For further information regarding student responsibilities related to academic integrity, please refer to Section 5.33.5 of the DSC policy, which can be viewed at <http://www.dixie.edu/humanres/policy/sec5/533.html>. Other portions of this policy are also relevant, especially as they relate to fostering a learning environment that does not discriminate and is conducive to learning.

Attendance Policy: Many students find some of the main concepts taught in this class difficult to understand. For these students, missing class makes learning the material significantly more challenging. Therefore, I strongly recommend that you attend class regularly and participate in class discussions. Regardless of the reason for an absence, **the student is responsible** to find out about, and make up, missed work or announcements made in class. Arrangements to take exams **ahead of time** (never after the due date) **must be made prior to the absence**, including a plan for making up the exam approved by the instructor. It has been rare for me to grant make-up exams after the exam is scheduled, but it is common for me to allow students to take an alternate exam **before** the exam is scheduled.

Classroom Policy: All students are strongly encouraged to participate in classroom discussions, but appropriate levels of maturity and respect (to the instructor and other students) must be demonstrated at all times.

Grading Information: Final grades in this course will be based on a percentage-based system, and there will **not** be a “curve” used to determine grades.

Grade Components: Quizzes (15%), Midterm Exams (60%), Final Exam (25%).

Grading Scale	
Grade	Range
A	>91%
A-	89-91%
B+	86-88%
B	82-85%
B-	79-81%
C+	76-78%
C	72-75%
C-	69-71%
D+	66-68%
D	62-65%
D-	59-61%
F	<59%

Quizzes will be administered through Canvas. You can take the quizzes any time it is convenient up to a half-hour **before** the next class period. The material covered on the quiz will be the **next class period’s reading assignment**.

Midterm Exams will be administered in the Testing Center. Each midterm exam must be taken during the exam time specified below. The material covered on each exam will reflect the material from the previous exam until and including the material on the last class before the exam period.

Grading

Grading will be based on three criteria: three Midterm Exams (60% total), a Final Exam (25%), and quizzes (15%).

Midterms: There will be three Midterm Exams in this course. Each exam will consist of a combination of true/false and multiple choice questions, plus a few other types of questions, such as fill-in-the-blank. All midterm exams will be administered in the Testing Center and must be completed during the dates specified on the syllabus. **It is your responsibility to make sure the Testing Center is**

Exam	Window
Exam 1	2/10/11 10:30 am – 2/14/11 10:00 pm
Exam 2	3/24/11 10:30 am – 3/28/11 10:00 pm
Exam 3	4/26/11 10:30 am – 4/29/11 10:00 pm

open and available. Your highest-scoring Midterm Exam will count 25% toward your final grade, the second-highest Midterm Exam will count 20%, and the lowest-scoring Midterm Exam will count 15% toward your final grade.

Final: The Final Exam will be administered in class during Finals Week and will cover material discussed throughout the semester. Your score on this exam accounts for 25% of your final grade and will consist of only true/false and multiple-choice questions. **You will need to provide an answer sheet for the Final Exam.**

Quizzes: Quizzes must be completed by a half-hour **before each class period** when there is a reading assignment (every class except the first class and review periods), and the quizzes must be taken through Canvas. The quizzes will be short (typically 5 questions) and will test your understanding of the basic concepts from the assigned readings for the coming class period. The combined average of all quiz scores will comprise 15% of your final grade. The lowest 3 quiz scores will not be factored into your grade (i.e., they will be “dropped”). **No make-up quizzes will be offered.** If you are likely to miss a significant period of time and will not be able to take a quiz, you may request to take a quiz in advance. Please contact me **at least 48 hours in prior to leaving** in order to make these arrangements. Remember, since quizzes can be taken online, even if you are out of town you still may be able to take a quiz during the assigned quiz period.

Make-up Exam Policy

Make-up exams are not allowed, except in the event of *extreme* and *unanticipated* circumstances. If there is a reasonable reason to believe that a situation will arise that might prevent you from taking an exam at the scheduled time (such as participation in a school-related activity), it is **your responsibility** to make arrangements with the instructor **ahead of the scheduled exam date**. At least 2 days’ notice is customarily expected, and more time may be required in many cases to make adequate alternative arrangements. **In virtually all cases, the make-up exam will be taken before the scheduled date.**

Grade Calculation: Grades are calculated based on percentages for each quiz/exam and for each grade category (quizzes, midterms, final exam). **The total number of points does not matter in calculating your grade.** For example, if you score 4 out of 4 on one quiz, that counts as a grade of 100%; if you score 4 out of 5 on another quiz, that counts as a grade of 80%. Those two quizzes would lead to a Quiz Average of 90% (average of 80% and 100%), not 88.9% (8 out of 9 total points). The same principle applies to Midterm Exam grades, although for midterms each exam percentage is multiplied by a different percentage depending on whether it is your lowest or highest midterm score (based on percentage). To calculate your grade for the class, first calculate your Quiz Average (QA) by averaging the **percentage scores** from each quiz, except for the three lowest quizzes which are not counted toward your grade. Next, calculate your Midterm Average (MA) by averaging the **percentage scores** from your Midterm Exam scores, with the highest two Midterm Exam scores each counting 25% of your grade and the lowest Midterm Exam score counting 15% of your grade (based on each midterm’s percentage score). To calculate your overall grade, use the following formula:

$$(QA\% * .15) + (ME1\% * .25) + (ME2\% * .20) + (ME3\% * .15) + (FE\% * .25)$$

This sum will be your total percentage grade in the course; use this to determine your letter grade in the course based on the Grading Scale listed above.

Course Outline

The reading assignments are listed below for each class meeting date. Unless otherwise specified, the reading is from the Reisberg textbook; other readings are available on Blackboard. You are welcome to read the documents electronically directly through Blackboard or to print them out to have a paper copy, but when readings are assigned that are available on Blackboard I will expect that you received them.

Course Schedule

<u>Date</u>	<u>Reading Description</u>	<u>Pages</u>
Tue., Jan. 8	Introduction to the Course	---
Thu., Jan. 10	The science of the mind	1: 4-23
Tue., Jan. 15	Sensation and perception (vision)	2: 40-55
Thu., Jan. 17	Visual object recognition	3: 59-73
Tue., Jan. 22	Feature nets and word recognition	3: 73-95
Thu., Jan. 24	Visual imagery: like perception	11: 339-355
Tue., Jan. 29	Visual imagery: not like perception	11: 355-370
Thu., Jan. 31	Attention: Costs and benefits	4: 97-110
Tue., Feb. 5	Attention theories	4: 110-128
Thu., Feb. 7	Leftover material and review for Midterm 1	---
Tue., Feb. 12	The magical number 7±2	Miller; Halpern & Miller
Thu., Feb. 14	Working memory defined	5: 133-148
Tue., Feb. 19	Memory acquisition	5: 148-166
Thu., Feb. 21	Encoding and retrieval	6: 167-178
Tue., Feb. 26	Implicit memory and amnesia	6: 178-197
Thu., Feb.28	Memory errors	7: 198-211
Tue., Mar. 5	Better long-term memory	7: 211-232
Thu., Mar. 7	Long-term memory networks	8: 235-250
Mar. 11-15	Spring Break – no class	---
Tue., Mar. 19	Retrieving from long-term memory	8: 250-266
Thu., Mar. 21	Leftover material and review for Midterm 2	---
Tue., Mar. 26	Conceptual and generic knowledge	9: 267-283
Thu., Mar. 28	Flaws with this approach	9:283-300

Comment [RC1]: Change to p. 38

¹ ME1 = highest midterm percentage; ME2 = second highest midterm percentage; ME3 = lowest midterm percentage

Tue., Apr. 2	Language basics	10: 301-315
Thu., Apr. 4	Language rules	10: 315-337
Tue., Apr. 9	Heuristics	12: 375-408
Thu., Apr. 11	Reasoning and logic	13: 409-425
Tue., Apr. 16	Decision making	13: 425-443
Thu., Apr. 18	Problem solving and creativity	14: 444-476
Tue., Apr. 23	Leftover material and review for Midterm 3	---
Thu., Apr. 25	Final Exam Review	
Tue., Apr. 30	8:00 a.m. – 10:00 a.m. – Final Exam in class	All of it
