Final Thought

As a result of using the Socratic methodology it is important to participate in class. Without active participation in the class the only possible ingredients for the final grade are the raw numbers from the results of quizzes, mid-term exam, position paper, discussion board, and the final exam. If, on the other hand, you have demonstrated a further grasp of the material through class participation, then your final grade may be raised. Participation is evaluated by willingness to contribute in both small group (Learning Team) and in full class discussions through questions, insights and observations.

EDUCATION: *That which discloses to the wise and disguises from the foolish their lack of understanding.*
